

Handwritten notes on a piece of paper taped to a desk. The text is in Indonesian and includes a diagram of a trapezoid with labels 'a' and 'b' for the top and bottom bases, and 'h' for the height. The notes discuss the area of a trapezoid and provide a formula: $L = \frac{1}{2} (a + b) \cdot h$. The text is somewhat messy and includes some corrections.

1. Luas trapezoid adalah $\frac{1}{2} (a + b) \cdot h$
2. Luas trapezoid adalah $\frac{1}{2} (a + b) \cdot h$
3. Luas trapezoid adalah $\frac{1}{2} (a + b) \cdot h$
4. Luas trapezoid adalah $\frac{1}{2} (a + b) \cdot h$
5. Luas trapezoid adalah $\frac{1}{2} (a + b) \cdot h$
