A white, rectangular water heater is mounted on the wall. It has a control panel on the right side and a vent pipe at the top. A white electrical cord is plugged into a wall outlet above it.

A gas control valve is mounted on the wall, connected to a vertical gas pipe. It has a yellow gas line and a white electrical wire connected to it.

Several grey pipes and conduits are visible. One pipe runs vertically from the water heater down to a horizontal pipe. Another pipe runs vertically from the gas valve down to a horizontal pipe. A third pipe runs horizontally across the wall, connecting the two vertical pipes. A fourth pipe runs vertically from the ceiling down to a horizontal pipe that runs along the top of the wall.

A black pipe enters the room from a hole in the floor. The hole is roughly rectangular and the pipe is partially visible inside.

A wooden-handled tool, possibly a brush or a scraper, lies on the floor in the bottom left corner.
