The image shows a Siemens alarm control panel mounted on a wall. The panel is white with a grey control area. It features several buttons: a red emergency button, a green button, and several smaller grey buttons. There is a small digital display showing '000000'. The panel is connected to several orange cables that run vertically up the wall. To the left of the panel are two smaller boxes, one blue and one yellow, both with text in multiple languages. The blue box is labeled 'Hausalarm' and the yellow box is labeled 'Löschauslösung'. The entire setup is mounted on a light-colored wall.
