The main electrical panel is visible through a clear glass door. It contains two digital meters at the bottom, a central circuit breaker, and a terminal block on the right. The panel is populated with various components and wiring:

- Meters:** Two digital meters are located at the bottom. The left one is labeled 'PTC' and the right one is labeled 'P2'. Both have yellow labels.
- Circuit Breaker:** A white circuit breaker is mounted in the center. It is labeled 'CNC' and 'BA-7/8'. It has a green 'OFF' button and a yellow 'ON' button.
- Terminal Block:** A white terminal block is located on the right side, with multiple colored wires connected to it.
- Wiring:** Numerous colored wires (yellow, green, red, blue) are connected to the components. Some wires are bundled together.
- Warning Labels:** Yellow lightning bolt warning symbols are placed on the panel to indicate high voltage areas.
- Labels:** Several white labels with black text are attached to the panel, providing technical specifications and safety information.
